How safe are our students on campus? Understanding the components of a unified enterprise security solution

Why campus safety is so important:

- 38,000 assaults on college campuses in 2017
- 81.42% worst years on record for gun-related deaths on campus

Unified security components

1. Unified ID credential
   - 19% of college students wear their college ID all the time
   - FEATURES: Easy identification, reduced access permissions

2. Door access control
   - 40% of college accidents occur when they change doors to their own room
   - FEATURES: Access control, biometric technology, membership

3. Integrated video surveillance
   - 96% of video surveillance systems provide evidence for investigations
   - FEATURES: Surveillance, emergency support, video monitoring

4. Active community engagement
   - 79% of incidents are preventable due to enhanced threat indicators
   - FEATURES: Emergency announcements, interactive student safety app

5. Enterprise control & monitoring
   - 63% of college campus safety system integration is a significant challenge
   - FEATURES: Integration with key campus systems, intelligent sensors, system exception management

Transact Security Management meets the unique needs of the education community.
